Position: Vineyard Specialist

Type of work: Full-time

Compensation: Tiered depending on work-type. ($45,000-$65,000/yr)

Benefits: Health Insurance stipend, PTO

Overview: Mid-Atlantic Viticultural Services (MAVS) is looking for motivated individuals that can work together as part of a team to maintain the functionality and beauty of various vineyards in the Mid-Atlantic. MAVS is a company interested in hiring people of upright moral character as well as a diligent and honest work ethic. This position will require working outside in many different weather conditions including extreme heat, humidity, cold, and windy conditions. Time spent in a variety of vineyard settings will require individuals to continually pay attention to their surroundings as well as learn and develop their working knowledge of our client's sites.

Job Requirements:

- Diligent work ethic
- Able to work as part of a team
- Able to follow specific and detailed instructions
- Physically capable of working outside all day, year round
    - Be able to repeatedly lift 50 lbs safely off the ground
- Spanish speaking not required but a plus

Essential Duties and Responsibilities (According to industry best practices):

- Vine management throughout the year (Responsible for all cultural practices in the vineyard):
    - Prune, remove prunings, train vines into trellising, suckering, shoot thinning, leaf pulling, hedging, netting, harvesting, planting
- Observe and report vineyard status and changes throughout the season via vineyard scouting reports, soil and tissue sampling
- Design and install vineyards
- Design and implement spray plans
- Collaborate with a wide variety of clients to understand their goals and create farm management plans
- Look out for the safety of yourself and all persons working in and around the vineyard
- Report to work site on time
- Continually show the following traits: honest, desire to learn, common sense, and attention to detail
